

Your Single Pane of Glass for Asset Visibility.

ENTUITY ASSET MANAGEMENT DATA SHEET

Your IT infrastructure is dynamic, with physical and virtual IT assets inside and outside the enterprise. Entuity Software allows you to rapidly adapt to changing requirements and advancing technology with its Asset Management functionality. With the updated Asset Management feature, you'll get a holistic view of your IT infrastructure environment in a ready-to-use CMDB dashboard – giving you the ability to rapidly discover new assets and take them under monitoring or management or simply report out on your ever-evolving environments.

Automated Discovery:

Entuity's Auto Discovery tool saves you time and gives you peace of mind that everything on your network infrastructure is accounted for. Entuity will discover the devices that you need using SNMP, SSH, WinRM (WMI), APIs and other vendor-proprietary protocols. Schedule your Discovery profiles to run at a cadence that meets your business needs and Entuity will automatically update its CMDB with the latest polling results, highlighting any new assets that appear.

DISCOVERY PROTOCOLS

LAYER 3

- IP Peering
- Traceroute (Ping)

LAYER 2

- Cisco Discovery Protocol (CDP)
- Link Layer Discovery Protocol (LLDP)
- Spanning Tree
- SynOptics Network Management Protocol (SONMP)
- Physical Address Matching

ROUTING PROTOCOLS

- Border Gateway Protocol (BGP)
- Enhanced Interior Gateway Routing Protocol (EIGRP)
- Intermediate System to Intermediate System (IS-IS)
- Open Shortest Path First (OSPF)

OTHER

- Host Detection
- User Defined Connections
- Hypervisor Detection
- IPv6 ND (part of the IPv6 module)
- VM Detection

The screenshot displays the Entuity Asset Management interface. At the top, there are tabs for 'Managed Assets', 'Discovered Assets', and 'Auto Discovery'. Below these, there are filters for 'Show New Assets Only', 'Show Not Managed Only', and a 'Filter Tools' button. The main dashboard area is divided into several sections: 'License Consumption' with a bar chart, 'Asset Summary' with a donut chart showing 44 total assets (31 Managed, 0 Not Managed, 13 New), and 'Credential Status' with a donut chart showing 41 total credentials (35 OK, 6 Invalid, 1 Missing). Below these charts is a table of discovered assets.

Asset Management Data Sheet

Managed Assets:

Focus on what is important on your network with Entuity's Managed Asset view. Entuity's Asset Management separates out your Managed Assets from your Discovered Assets, allowing you to quickly identify which devices you have under management, which license they have applied, and what level of management on each device. Additionally, you can modify or take new assets under management directly through the UI.

SUPPORTED DEVICES:

Network Device • SD Controller • Server Asset
Storage Device • VM Platform • Custom

MONITORED COMPONENTS:

- Status
- Asset Name
- IP Address
- Type
- Vendor
- Model
- Serial Number
- Views
- Configuration License
- Managed Since
- Associated Assets
- Description
- Location
- Poll Name
- Zone
- SNMP Type
- Certified

Uncommon Versatility — Integration with Industry Leaders Adds More Value

Entuity can easily be integrated with industry leaders such as BMC Software, VMware, Dell, ServiceNow, Splunk and Moogsoft delivering a uniform way to share network infrastructure data with application monitoring for a far-reaching management platform.

Network Management for Today and Tomorrow

Representing a solid alternative to multiple disparate network tools and expensive platform solutions, Entuity is known for its short training time and ease of management and administration. It adapts to how you wish to manage your environment and is up and running within hours. For more information visit: ParkPlaceTechnologies.com/Entuity.

PARK PLACE
TECHNOLOGIES

Park Place Technologies is your global data centre and networking optimisation firm. Powered by the world's largest on-the-ground engineering team, a robust group of advanced engineers and our Enterprise Operations Centre we leverage a global parts supply chain, automation, machine learning and a comprehensive portfolio of services and products to optimise networking and data centre Uptime and performance.

Park Place's industry-leading and award-winning services include Park Place Hardware Maintenance™, Park Place Professional Services™, ParkView Managed Services™, Entuity Software™ and Curvature Hardware sales.
