

Product Highlights

- Enterprise scalability. Scales easily, federated architecture for seamless expansion.
- Supports multi-tenancy including overlapping IP addresses for management from the same server.
- Provides the industry's best custom dashboard builder to reflect how IT organizations manage their networks.
- Always-on business services require always-connected management. 100% mobile enabled for management from laptops, smartphones and tablets.
- Monitors the performance and health of your server, storage, and network devices and environments.
- Integrates with 3rd party vendors—BMC, Dell, ServiceNow, Oracle, Moogsoft, Splunk and more.
