ENTUITY SOFTWARE™
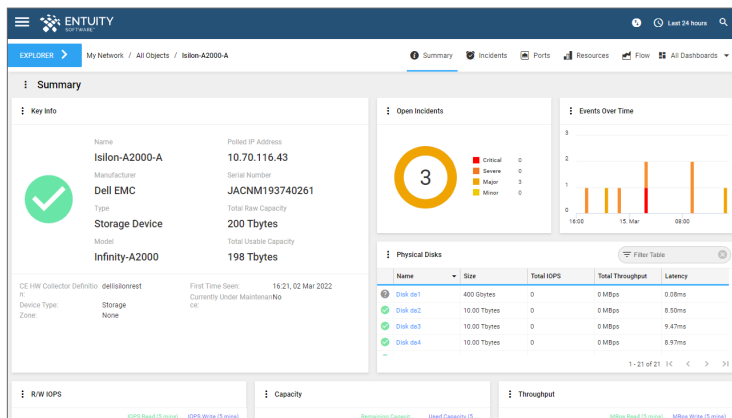

Storage Monitoring

Entuity automatically discovers your storage arrays, allowing you to take your assets and their environments directly under monitoring. Ensure your storage systems maintain the availability and performance that you expect with detailed performance metrics and event management.

Performance Monitoring:

Deep visibility of your storage array allows you to get the insights you want immediately or dive deep into your environment. Entuity monitors the capacity of your disks, latency, IOPS, and throughputs to provide you with the insights needed to maintain high-availability and plan for future capacity requirements.

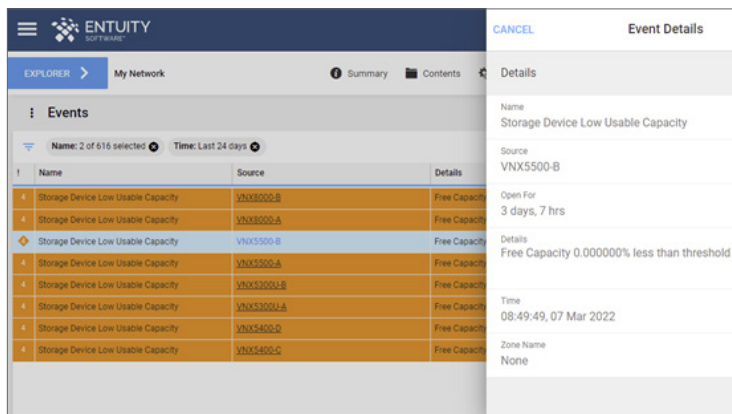

SUPPORTED DEVICES:

Dell EMC • Pure

MONITORED COMPONENTS:

• Raw Disk Capacity

• Useable Disk Capacity

• Latency

• IOPS

• Throughput

Event Managment:

Move beyond observability and into actionability with Entuity's proactive event management system. Entuity creates dynamic thresholds and baselines on your storage environments and segments events into 5 different severity levels. These events contain all the details needed to diagnose the issue as well as appended data on the asset itself.

EVENT EXAMPLES:

• Storage device:

  • High CPU/memory usage

  • Low usable capacity

• Physical disks:

  • High soft/hard error count (rate)

  • High latency

• Storage pools:

  • High % full

  • High latency

  • High soft/hard error count (rate)

• LUNs:

  • High latency

  • High provisioned used (%)

• Volumes:

  • High latency

  • High provisioned used (%)

• Ports:

  • High utilisation %

  • Status (port down)

# Entuity Includes Everything You Need to Manage Your Digital Environment:

- Auto Discovery and Asset Management
- Dynamic Event Management System
- Network Performance Monitoring & Management
- Server Performance Monitoring
- Storage Performance Monitoring
- Configuration Management and Monitoring
- Network Flow Monitoring

- SurePath Application Path Monitoring
- Enhanced User Defined Polling
- Live Topology and Geographic Maps
- Root Cause Analysis
- Multi-Cloud Support — AWS, Azure
- Third Party Vendor Integrations
- Seamless and Infinite Scalability

Entuity Built-In Modules Supply Specialised Functionality

Entuity contains modules for specific management capabilities: SurePath Application Monitoring, IBM BladeCenters, QoS, MPLS, Firewalls, Cisco Unified Communications Manager, Cisco IPSLA, Wireless, Cisco ACI, High Availability, Routing Protocols and VPN Gateways.

Uncommon Versatility — Integration with Industry Leaders Adds More Value

Entuity can easily be integrated with industry leaders such as BMC Software, VMware, Dell, ServiceNow, Splunk and Moogsoft - delivering a uniform way to share network infrastructure data with application monitoring for a far-reaching management platform.

The Entuity NetFlow Dashboard provides at-a-glance traffic details for ease of monitoring.

Infrastructure Management for Today and Tomorrow

Representing a solid alternative to multiple disparate network tools and expensive platform solutions, Entuity is known for its short training time and ease of management and administration. It adapts to how you wish to manage your environment and is up and running within hours.

PARK PLACE TECHNOLOGIES

Park Place Technologies is your global data center and networking optimisation firm. Powered by the world's largest on-the-ground engineering team, a robust group of advanced engineers and our Enterprise Operations Center we leverage a global parts supply chain, automation, machine learning and a comprehensive portfolio of services and products to optimise networking and data center Uptime and performance.

Park Place's industry-leading and award-winning services include Park Place Hardware Maintenance™, Park Place Professional Services™, ParkView Managed Services™, Entuity Software™ and Curvature Hardware sales.
